Aerola Repigmentation Aftercare Information

Dr. Derm is a clear barrier film placed on your tissue to protect the skin after your tattoo procedure.

Please leave the film on for 2 days and remove while in the shower. Saturate the film with water and gently roll it off the skin.

Pat the tissue dry and use a thin layer of the ointment provided by your technician, twice daily for 5 days.

Your healing time is approximately 5-7 days;
Please use the ointment provided for the entire healing schedule.

The tattoo will fade slightly and become softer during the healing process.

If there are any questions please call 858-356-9943
